EQUIPMENT TRACKING

COMPLETE ASSET VISIBILITY SOLUTIONS

X.1

Tethered Tracking

w/6 month Rechargeable Battery

The iVision X.1 is designed for reliable, permanent deployment. The rechargeable lithium ion battery makes it an ideal solution for managing assets that are tethered to a 12 or 24 volt system. The X.1 transmits location every 3 minutes when in motion, and once per day for 6 months under battery power alone.

iVision X.1 Additional Features

- Latest location, breadcrumb trail, proximity search, **geo fence capable**
- GPS ping every 3 min. when connected
- No maintenance needed

Breadcrumb trail

X.5

5 yr. Wireless Tracking

Never Needs Recharging

The iVision X.5 is a non-rechargeable asset tracking unit designed for reliable, multi-year deployments on assets and needs no connection to power. The X.5 is great for any asset that requires tracking, has no power source, and easy installation is required. The X.5 sends 1 GPS location per day for at least 5 years.

iVision X.5 Additional Features

- No external power source needed
- 5 year battery life
- GPS ping once daily
- No maintenance needed

Location mapping

WE WON'T BE UNDERSOLD!

iVision Series Benefits

- Superior GPS performance
- Weather, temperature, humidity, shock, and vibration proof
- Internal antennas for both cellular and GPS
- Mount virtually anywhere
- Over-the-air serviceability with anti-jamming technology
- Web portal viewing
